

Why Choose Us?

- 1 A team of experienced professionals with multinational exposure.
- 2 Advanced technology for high-performance plastic processing. Expertise in corrosion-resistant coatings.
- 3 Custom formulations and high-tech machinery for efficient compounding.
- 4 Strong market presence in the plastic and rubber compounding industry.

About Us

Dream Merchants is a group of companies specializing in plastics, rubbers, chemicals, and anti-corrosion solutions. The company deals in turnkey projects, machine manufacturing, project exports, consultancy, commodity exports, and R&D in plastics, rubbers, and chemicals.

Services

Manufacturing high-performance plastic processing machines. Producing specialized kneader-extruder systems, twin-screw compounding extruders, and laboratory compounding machines

Corrosion protection solutions with government-approved co-polymeric and chemical coatings

Turnkey solutions for compounding, recycling, and polymer processing. R&D and consultancy in plastic and rubber compounding.

Our Mission

To provide high-quality plastic compounding solutions through innovation, advanced technology, and expert consultancy, ensuring efficiency and cost-effectiveness for our clients while promoting sustainable and high-performance materials.

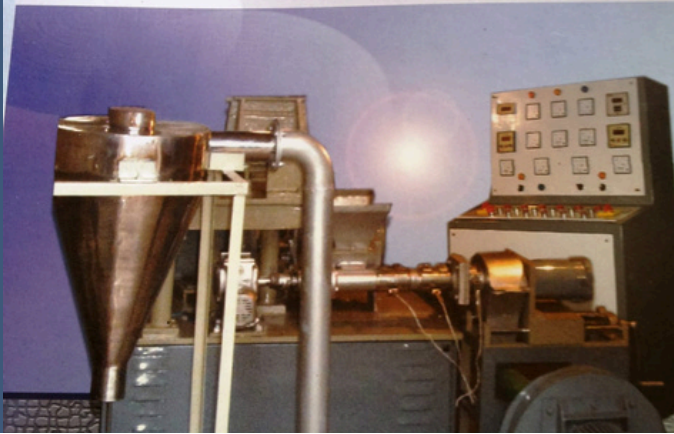

“
**Excellence in every
compound, perfection in
every process.**
”

What We Offer?

- A range of plastic compounding machines, including twin-screw extruders and kneader-extruder systems.
- Plastic and rubber compounds such as TPR, TPO, XLPE, PVC, TPE, TPV, and NEA compounds. Masterbatches for various applications.
- Industrial solutions for the automotive, medical, electrical, footwear, and construction industries.

FULLY AUTOMATED
PELLETIZING LINES
FOR ALL
THERMO PLASTICS & RUBBERS

Achievements

- 1** Expanded operations to support major players in automotive, medical, and industrial sectors.
- 2** Recognized for delivering high-quality, innovative, and cost-effective polymer solutions.
- 3** Developed and supplied specialized masterbatches and polymer compounds with excellent profitability and high demand.
